

## Letter of Recommendation for Benn Tan

19th May 2021

To whom it may concern,

Benn Tan worked for DrinksGoWhere as a Software Engineer from Jan 2021 right until he enlisted into the army in Feb 2021. Albeit a short stint, Benn worked on essential Node.js scripts that sped up our entire client onboarding process. Aside from being a very meticulous, creative and hardworking engineer. Benn is very open to criticism and takes the initiative to go above and beyond his calling to come up with effective solutions.

Watching him work has been a real pleasure and I am sure that he would be of great value to any organisation.

I wish him the very best for his future!
